Ottawa September 1st, 1904.

In presenting our NINTH ANNUAL BULB CATALOGUE we take the opportunity of thanking our many customers for past favors. Our Bulb trade is steadily increasing and deservedly so. We know of no branch of horticulture so easy and at the same time so satisfactory to the amateur as Bulb Culture. The business is still in its infancy however, as far as the amateur is concerned and we confidently look for an ever increasing trade in this line. We have therefore imported still larger quantities this season of the very HIGHEST GRADES procurable. The same grades as we plant ourselves in our own business—and we have put the price as low as warrantable for FIRST QUALITY STOCK. We would ask growers who have not dealt with us to give us a trial order.

We prepay carriage charges on all Bulbs catalogued at dozen rates and under. Plants and other articles expressed at Customer's charges except where noted.

*Dealers, Florists and Growers of large quantities will please write us for Special Prices.
Seed Catalogue issued 15th January.*

HINTS ON BULB CULTURE

“It is a poor story that is not worth telling twice.” We have told the story of Bulb Culture so often now, that it seems to ourselves superfluous saying anything more about it. The vast majority of the people however are still comparatively ignorant about growing Bulbs, many indeed who would like to grow them do not know what they are. We are, for instance, often asked in April and May for “the roots of these flowers blooming in Major’s Hill Park or on the Driveway.” Many people imagine that there is some mystery about growing Bulbs—some professional skill required that may take half a lifetime to master. We again reiterate the statement, that there is no skill required in their cultivation—that Bulb Culture is the easiest branch of horticulture for anyone to engage in—that anyone may have a succession of the most beautiful flowers in their dwellings from December till Spring by following these simple hints :—

The bulbs enumerated in this catalogue (particularly the Dutch and French) may for the purpose of the amateur—be divided into three classes, viz. :—1. **Those best adapted for house culture.** 2. **Those best adapted for the garden,** and 3. A combination class—**Those adapted for either the former modes.** The first named class may again be divided into early and late blooming bulbs, the former being available at or before Christmas, and the latter from the middle of January until April or May. For Christmas blooming, only Early Roman Hyacinths, Paper White Narcissus and Chinese Sacred Lilies should be planted. For general house culture the foregoing, together with the various Hyacinths, Polyanthus Narcissus and Daffodils, may be successfully grown. While large numbers of Tulips are grown by florists for winter flowers, the average amateur will find them difficult to manage.

For house culture pans are more effective than pots : a 5-inch pan holding one Dutch Hyacinth ; a 6-inch pan holding five Roman or Miniature Dutch Hyacinths, and for Narcissus larger pans should be used.

When planting use any **light, moderately rich soil** (avoiding any manure that is not thoroughly decomposed). We can supply a Special Compost at 25c. per bushel. Fill the pots or pans loosely almost to the top, press the bulbs into the soil so that only about one-quarter will show above the surface, strike the pot sharply to settle the soil, water thoroughly and place away in a **cool dark situation.** The ideal situation is outside (their native soil) covered with sufficient leaves or other material to prevent severe freezing. But as in winter they are somewhat difficult to get at if treated thus, the next best place is a **cool cellar.** The bulbs being **covered with three or four inches of leaves, sawdust or sand to exclude the air** and retain moisture.

Examine them occasionally to see that they do not become dry, and keep them there two or three months (the later the better) before bringing them to the light. As the leaves and flowers develop do not stint the water. Keep them cool even then, and they will help to cheer the winter’s gloom wonderfully. Freesias and Easter Lilies do not require to be started in the dark.

Hyacinths Grown in Glasses.

For glass culture the Highest Grade bulbs only should be used. Clean out your glasses thoroughly. If easily procured put in each glass a small nodule of charcoal (we will not attempt to explain why this should be done). Do not worry about the charcoal, however, for the bulbs will grow without it. Fill the glasses nearly full with soft water, and place the bulb **so that its base nearly touches the water.** The glasses may then be placed in a box in a cool, dark cellar, and covered with leaves as before mentioned. Look at them now and again and replenish the water if it is offensive, keeping it up to the same level, but **not in direct contact with the bulbs** or the latter may rot. Leave your glasses in this position for two months or more, bringing them into the light to flower as they are wanted.

Bulbs Grown Outside.

Hyacinths, Tulips of all kinds, Crocus, and many varieties of Daffodils, are perfectly hardy outdoors. For outside culture (the Tulip being pre-eminently the most popular), plant thickly and deeply—six inches apart and six inches deep—except Crocus and other small bulbs, which should be planted at less depth—early as possible in October. Cover with a few inches of litter the end of November. Remove same first thing in spring, and nature will do the rest.

One Dollar Collections

of High Grade Flowering Bulbs

For the benefit of those who are at a loss in selecting suitable bulbs for House and Outdoor Culture, we offer the following collections of what, in our own experience, we consider the most satisfactory varieties.

On the receipt of \$1.25 we will mail either collection to any address in Canada. When not posted price \$1.00 each.

Collection for House Culture

- 6 Early Roman Hyacinths
- 3 Choice Named Hyacinths
- 6 Pan Hyacinths in two colors
- 6 Paper White Narcissus
- 6 Mammoth Freesias
- 6 Best Forcing Tulips
- 6 Trumpet Major Narcissus

Collection for Outdoor Culture

- 25 Double Mixed Tulips
- 25 Single Mixed Tulips
- 50 Crocus, Giant Flowering
- 25 Double Parrot Tulips
- 25 Narcissus Poeticus Ornatus

The above bulbs must not be confounded with the low grade cheap bulbs generally sent out in collections. OURS ARE STRICTLY FIRST CLASS

Early Roman Hyacinths

Roman Hyacinths are the only Hyacinths that will bloom satisfactorily for Christmas.

Roman Hyacinths should be planted as early as possible ; from 3 to 6 bulbs in a pot make a good display. : : :

13 to 15 centim, per 100.....	\$3 00
13 to 15 centim, per dozen.....	50
13 to 15 centim, each.....	05

In all classes of Hyacinths we will sell 25 Bulbs at the 100 rates.

FREESIA

Refracta Alba

OR AFRICAN LILY OF THE VALLEY

A Bulb of very easy growth indoors, and one of the most beautiful and delicately perfumed little flowers in cultivation.

The principal reason of the general failure of this bulb with the amateur, is the fact of its being planted too late in the season, when the bulbs are as a rule impaired by shopkeeping. Plant early,

Mammoth Bulbs, per 100, \$1.00; doz. 25c.

Freesia

Extra Choice and Rare Hyacinths.

Asparagus Sprengeri—A beautiful variety of graceful, drooping habit, especially adapted for a pot plant. 10c. and 20c. each.

Araucaria Excelsa (Norfolk Island Pine)—Unrivalled in the plant world for symmetry of form, grace and beauty of foliage. 1st size, \$1.00; larger plants, \$2.00; extra size, \$3.00 each.

Begonias—Including Rex in variety, Metallica, Thurstoni, De Lesseps, Incarnata, Vernon, Alba Picta, &c. Small plants, 10c. each; fine plants for table or window decoration, 25-50c. each.

Chrysanthemums—Nice stocky plants of the varieties most suitable for pot culture (season of blooming from middle of October to end of November). 6- and 7-inch pots, 50c. and 75c. each.

Cyclamens—These beautiful plants are a wealth of rich bloom during the winter. 25c. to 50c. each.

Dracæna Indivisa—(Fountain Plant)—Fine, hardy and graceful plant for house culture. 25c. to 50c. each.

Ferns—Our stock of house ferns this season is large, varied and in fine condition. We offer only those varieties that are most suitable for house culture, including *Adiantum Cuneatum*, *Adiantum Pubesceus*, *Cyrtomium*, *Nephrolepis Piersonii*, *Nephrolepis*, *Bostoniensis* (Boston Fern), *Nephrolepis Cordata Compacta* (Sword Fern), *Pteris Cretica*, *Pteris Ouvrardi*, *Pteris Tremula*, *Magnifica*, *Aspidium*, etc. Plants, 10c., 15c., 25c., 40c., 50c., 75c., \$1.00 and \$1.50 each.

FERNS IN PANS—These are constantly growing in popularity for table and window decoration. We can supply pans of mixed ferns prettily arranged at 30c., 40c., 50c. and 75c. each.

Primulas—There is probably no blooming plant grown that will give so much pleasure for so long a season, with so little care and expense, as a Primula. Our stock this season, from high grade seed, is very promising. Price, 25c. each.

Primula Obconica—A profuse blooming primrose bearing on long spikes 10 to 15 flowers; white, shading to blue, 25c. each.

Rubber Plants (*Ficus Elastica*)—One of the finest plants for parlor decoration. Its thick, leathery leaves enable it to stand excessive heat and dryness, while their imposing size and deep glossy green always present a cheerful and effective appearance. Price, plants 10 to 12 in. high, 50c. each; 15 to 18 in. high, 75c. each; plants 2 to 2½ ft. high, \$1.50.

Pandanus Utilis (Screw Pine)—Large plants of these are very handsome. Price, 50c.

Pandanus Veitchii—A finer and variegated form. \$2.00 each.

Asparagus Plumosus

Kentia Fosteriana

Latania Borbonica

PALMS

Palms have become an almost indispensable feature in all decorations, whether for apartments, conservatories or window gardening. We have, this season, a larger and better stock than ever before. The varieties we offer are selected as being the best adapted to general cultivation in house or conservatory.

Cocos Weddelliana—This beautiful Palm is unquestionably the most graceful in cultivation. It is admirably adapted for centres of jardinières, and for dinner table decoration it cannot be excelled. Price, 50c., 75c. and \$1.00 each.

Kentia Belmoreana—This, and the following, are undoubtedly the most satisfactory and most effective for house culture. They are capable of standing more ill usage than any other class. Price, \$5.00, \$3.50, \$2.00, \$1.25 and 50c. each.

Kentia Fosteriana—A more vigorous grower than the preceding variety, plants the same price averaging about one-quarter larger than it, otherwise the appearance is almost identical. Price, \$5.00, \$3.00, \$2.00, \$1.25, 50c., and 25c. each.

Latania Borbonica—This is the typical Palm, and has, perhaps, in the past, been more largely used than any other. Its large, deeply-divided, fan-shaped leaves are very attractive, while the plant is extremely hardy. Price, \$2.50, \$1.50 and 75c. each.

Phoenix Reclinata—A large growing, graceful palm of easy cultivation, large specimens being especially effective. Price, 3.00 and \$1.50 each.

Hardy Perennials

We have a large and varied stock of these increasingly popular plants. Nearly all of herbaceous nature may be moved in autumn, while some, notably Paeonies, give better satisfaction if established at this season.

Call or write for any information on this matter.
